### **Expo Real 2007: Eight providers of real estate valuation services come together under the HypZert umbrella**

For the first time, a broad spectrum of eight providers of real estate valuation services to the financial industry will come together at this year's EXPO REAL under the umbrella of HypZert GmbH in **Hall C2, booth 322**. In the previous two years, Germany's leading company for the certification of real estate valuers was present at the trade fair together with the Appraisal Institute (AI) from Chicago in the USA. This year, the joint HypZert booth offers a one-stop shop for visitors, giving them the opportunity to address any questions they may have about real estate valuation directly to numerous specialists. Experts from the following companies will be there for the first time this year:

- Frankfurt School of Finance & Management, one of the leading education institutions for the financial industry in Germany,
- on-geo GmbH and "geoport-inframation", two leading service providers for geo information data, with on-geo GmbH also being a provider of the real estate valuation software LORA and reseller of the software ARGUS,
- M-Wert GmbH, Immobilien Rating GmbH (IRG), Vienna and NeuBridge LLC, New Jersey, three international valuation companies and
- Wertweiser GmbH, a provider of automatic real estate valuations for standardised residential real estate.

Representatives of HypZert e.V. will also be presenting the results of two studies at the booth:

9 October, 10:30 a.m.: **"Valuation of retail real estate"**

10 October, 10:30 a.m.: **"Valuation of rehabilitation clinics"**.
